

# 2-way SMS

Receive incoming SMS to systems, e-mail or inbox

**SMS Teknik offers two possibilities to send 2-way SMS. With unique virtual number as sender or with a replymodule which uses random numbers from a pool of numbers.**

The replymodule is possible to answer within 48 hour and is available with Swedish, Finnish, Norwegian, Danish, Dutch and Brittish numbers. You can use the replymodule for 2-way SMS in other countries, but sendernumber will be Swedish.

Virtual numbers are used for receiving all incoming SMS messages without a time limit.

*Reply module and Virtual number allows the customer to respond back to sent SMS*

Functions:

- The replymodule provides a useful function for fast two-way communication by linking the answers to the question/sent SMS
- Send SMS with a virtual number as sender, receive all replies along with other incoming SMS to the same number
- Receive information systems, e-mail or inbox
- Receive long SMS as one message or in parts
- Virtual Number is an additional service to SMS Connect and SMS Gateway
- The replymodule is an additional service to SMS Gateway HTTP/S, but included in a simpler form in SMS Connect web client and mobile apps where answers is forwarded only to the inbox
