

# MMS Gateway

Integrate MMS functionality in your system

**If you want to market your product or service with direct marketing through MMS dispatch, SMS Teknik AB has the solutions for you.**

With the service MMS Gateway you can send out MMS messages from your system/application to swedish numbers.

An MMS can carry a maximum of 300 KB of data. The content can be for example a presentation/slideshow, a video, a photo or an attached picture to text.

If you include the additional service for receiving MMS your contacts can send MMS messages to a short code with prefix of your choice.

*Use MMS as a costeffective marketing tool, send out text and pictures, music or videos*

Following functions is found in MMS Gateway:
