

SMS Connect

Send SMS from computer, cellphone or tablet

SMS Connect complements the traditional channels of communication to customers and employees. Contacts around the world can be reached easily, quickly and affordably.

SMS Connect includes Web client, Windows client, Web batchtool and Mobile Web App. Use the tool that works best for the moment, computer, cell phone or tablet.

Reply module for Web client and app is included in SMS Connect, to get an answer to sent SMS within 48 hours.

For 2-way communication in which the user can respond to received SMS indefinitely or the possibility to receive incoming sms, we offer our services for 2-way SMS via virtual number. Replies/incoming SMS are displayed in web-based inbox or forwarded to e-mail or url.

SMS Connect can be used both for individual text messages to employees or customers and for bulk mailing in marketing purposes

Following functions is found in SMS Connect:

- Send SMS to one or many recipients
- Load recipients from SMS Connect Address Book or from a file number list
- Make SMS mailings more personal by using variables in the message text
